Java Developer with hands-on experience in Spring Boot, REST APIs, Hibernate, and MySQL/PostgreSQL Database. Strong foundation in Core Java, OOP Concepts, Java 8 features, Collections, and Exception Handling with practical exposure through real-world projects. Passionate about building clean, scalable back-end systems.

EDUCATION

Master of Computer Application | **8.8 CGPA**
Bachelor of Science

Integral University | **2022-2024**
Shri Guru Gorakhnath PG College | **2018-2021**

CERTIFICATES AND TRAININGS

- Java Full Stack Developer Certification – **Naresh i Technologies, Hyderabad**
- Java Programming and OOPs Masterclass – **Naresh i Technologies (Jagannath Bhandari Sir)**
- Java BasicData Structures and Algorithms (DSA) – **Udemy**
- Frontend Development (HTML, CSS, JavaScript) – **Analyze InfoTech Pvt. Ltd.**
- Industrial Training Program – **Analyze InfoTech Pvt. Ltd.**
- Certified AI Productivity & Tools Specialist – **Be10x**

Technical Skills

- **Programming & Core Concepts:** Java (Core, OOPs, Collections), DSA, Design Patterns (Basic), HTML5, CSS3, JavaScript, & Bootstrap.
- **Back-end Technologies:** Java, Spring Framework, Spring Boot, Servlets, JSP
- **Databases:** PostgreSQL, MySQL, Oracle Database, SQL Developer, MongoDB
- **ORM & JPA:** Hibernate, Spring Data JPA
- **Tools & Build Systems:** Eclipse, IntelliJ IDEA, Maven, Gradle, Git, GitHub
- **Methodologies & Practices:** SDLC, Agile (Basic), Clean Code, Problem-Solving.
- **Other Skills:** JDBC, REST APIs, Design Patterns (Strategy, MVC), Internationalization (**i18n**), JNDI, HikariCP

PROJECTS

- 1. Actor Management System (Spring Boot MVC, JPA, MySQL)** **(Dec-2023 To april-2024)**
 - Developed a Spring Boot MVC web application to manage Actor records with CRUD operations (Add, Edit, Search, Soft Deletion).
 - Implemented Controller-Service-Repository layered architecture to ensure modularity, scalability, and maintainability.
 - Utilized Spring Data JPA with pagination and sorting for efficient data retrieval and user-friendly data display.
 - Integrated JSP, JSTL, and Expression Language (EL) for dynamic front-end rendering and seamless form handling.
 - Applied validation annotations (@NotNull, @Transient) to enforce robust input validation and maintain data consistency.
 - Demonstrated real-world back-end concepts such as soft deletion and pagination, improving usability and system performance.
- 2. Library Book Management System (Spring Boot MVC Project)** **(Sep-2025)**
 - Developed a Spring Boot MVC web application for managing library books with JSP, Spring Data JPA, and PostgreSQL.
 - Implemented CRUD operations (Add, Edit, Delete, View) with form validation using Bean Validation annotations.
 - Built features like search, sort, availability toggle, and genre selection to enhance user experience.
 - Designed Student-Book-Borrow/Transaction modules with entity relationships (One-to-Many, Many-to-One) and transactional borrow/return logic.
 - Integrated GST calculation, availability handling, and status updates for borrowed books.
 - Applied layered architecture (Controller, Service, Repository) and best practices in exception handling, logging, and clean coding.
 - Used Maven, Git, and Eclipse/IntelliJ for project build, version control, and development workflow.
