PROFESSIONAL SUMMARY

Java Developer with hands-on experience in Core Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, and REST APIs. Experienced in developing secure backend services using JWT authentication, RBAC, MySQL, and layered architecture. Currently working as a Software Developer Intern, contributing to full-stack applications using Java, Spring Boot, and Flutter, with experience in API integration, database development, testing, and Agile practices.

TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript, Dart
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Servlets, JSP, REST APIs
- **Frontend:** Flutter, HTML5, CSS3, Bootstrap
- **Databases** MySQL, PostgreSQL, Oracle, MongoDB
- **Messaging & DevOps:** Apache Kafka, Docker
- **Tools:** Git, GitHub, Maven, Gradle, IntelliJ IDEA, Eclipse, Android Studio, VS Code, Postman
- **Concepts:** OOP, Java 8, Collections, Multithreading, Exception Handling, JWT, Refresh Tokens, RBAC, MVC, SOLID, Agile

PROFESSIONAL EXPERIENCE

Software Developer Intern | Gaongram Pvt. Ltd., Lucknow | 2026 – Present

- Working as a Full Stack Developer, developing backend services using Java and Spring Boot and frontend modules using Flutter.
- Developed and integrated REST APIs with database-driven application modules using MySQL.
- Implemented JWT-based authentication, Refresh Tokens, and RBAC for secure application access.
- Built responsive Flutter modules using GetX state management and integrated them with backend services.
- Performed API testing using Postman and managed source code with Git in an Agile development environment.

PROJECTS

Appointment Booking SaaS Application

Java | Spring Boot | Spring Security | JPA | Hibernate | Flutter | MySQL | REST APIs | JWT | RBAC | Kafka | Docker | AWS EC2 | Cloudinary

Developed a full-stack appointment booking SaaS application using Spring Boot and Flutter. Implemented secure authentication, RBAC, appointment management, soft deletion, search, filtering, pagination, and geolocation using latitude and longitude. Integrated Cloudinary for image management and used Apache Kafka for asynchronous appointment and notification events. Containerized the backend using Docker and deployed it on AWS EC2.

Payment Gateway Simulation API

Java | Spring Boot | Spring Security | Spring Data JPA | Hibernate | PostgreSQL | REST APIs | JWT | Maven

Developed a payment gateway simulation API for dealer subscription payments supporting UPI, Card, and Net Banking. Implemented payment initiation, transaction persistence, PENDING/SUCCESS status handling, simulated gateway callbacks, secure REST APIs, and JWT-based authentication.

Library Book Management System

Spring Boot | Spring MVC | Spring Data JPA | PostgreSQL | REST APIs | JSP | PostgreSQL

Developed a Library Management System with CRUD REST APIs, book search, sorting, availability tracking, and Spring Data JPA relationships. Built using Spring Boot, PostgreSQL, JSP, Bean Validation, exception handling, transaction management, and layered architecture.

EDUCATION

MCA Integral University (CGPA 8.5/10)

BSc Shri Guru Gorakhnath PG College

CERTIFICATIONS

- Java Full Stack Developer - Naresh I Technologies
- Industrial Training Program– Analyze InfoTech Pvt. Ltd.
